Bridge Failures of History

Research as a group (3-4 students) and find at least three bridge failures per person.

Find the following for each bridge failure:

- a. Location, name
- b. What type of bridge?
- c. What caused the failure?
- d. Was it rebuilt?

If so, how was it improved?

If not, how would you have improved it?

- e. List resources!

Create a new document in your *Engineering* folder in Google titled *Bridge Failures*. Individually, write a paper informing what bridges you found and what you have learned from each bridge failure. This paper should be at least one full page. Remember correct citations for sources!
